

TECO Electric & Machinery specializes in motors, electric drives and mechanical power transmission products. We help businesses power their machinery with made-to-order equipment and responsive repair, maintenance and on-site support.

We share over 150 years of combined expertise with our parent company, TECO, and TECO-Westinghouse Motor Company (TWMC). With our manufacturing facilities and offices in South East Asia, we represent TECO's regional head office and are accomplished in customizing products for any special request.

TECO Electric & Machinery understands that technical know-how should always be coupled with service that cares. In our culture, our innovation and every work we do, our commitment to best-in-class quality has remained unchanged. Together with a responsive service and repair team, we have the regional expertise, manufacturing capability and global distribution and service network, to consistently meet and exceed every need.

Today, we are one of the top 5 global leaders in precision engineering for motors and related machinery. We have provided manufacturing and servicing solutions to both private and government sectors. Our clients include Singapore Mass Rapid Transit (SMRT), Land Transport Authority (LTA), Public Utilities Board (PUB), Housing Development Board (HDB), Jurong Town Council (JTC) and Changi Airport.
